# financial management solutions

Causeway Financial Management (FM) provides organisations involved in procuring and delivering construction projects with specialist software and services that increase their profitability.

Bringing together reliable cost, value and performance management capability, Causeway solutions enable organisations to increase process efficiency, manage cost and reduce risk, thereby optimising their ability to create shareholder value.

### Accounting

Causeway Financials delivers a genuine alternative to the often inflexible construction accounting packages of the past, or the apparently flexible but, in reality, prohibitively expensive ERP solutions. Causeway Financials offers companies in construction the most comprehensive solution to both the financial and commercial disciplines within their business without compromise.

Causeway Financials will help you to increase the profitability of your business by providing you with the tools to optimise cash flow, manage project performance, achieve transparency of costs and identify process efficiencies throughout your organisation.

By deploying a solution that meets the evolving contractual requirements of your clients you will ensure that you become the partner of choice within the industry.

### Project accounting

For companies undertaking building, civil engineering projects or term maintenance projects who are increasingly under pressure to deliver on time and within budget, Causeway Project Accounting provides you with the control you need.

Specifically developed to integrate with your corporate IT systems, Causeway Project Accounting enables reliable cost, value and performance management to be deployed on either a specific project or across the enterprise.

Causeway Project Accounting bridges the gap between the estimating and the financial disciplines within construction and, unlike traditional accounting orientated applications, provides the detailed and accurate project performance analysis your business requires.

Causeway Project Accounting has been developed in conjunction with the industry's largest contractors and clients to deliver comprehensive commercial management of all partnering, target cost and cost reimbursable contracts.

## Maintenance management

For companies undertaking infrastructure maintenance contracts, who are under increasing pressure to deliver best value, Causeway Maintenance Management provides you with the control you need.

Term Maintenance Contracts are notorious for generating large volumes of paper transactions, often resulting in manual processes and the re-keying of data between numerous systems. Causeway Maintenance Management has been specifically developed to offer detailed works order management and financial control of term maintenance contracts and is widely deployed within the Highways, Rail and Utilities sectors.

By providing seamless integration with clients' asset management systems, Causeway Maintenance Management electronically links contractors and clients, ensuring proactive performance management of infrastructure maintenance contracts.

## Estimating

Causeway Estimating will help produce accurate bids, fast. Unlike other estimating systems which are nothing more than stand-alone pricing tools, Causeway provides estimating as part of an integrated supply chain management suite,

Using Causeway Estimating will help your business log, assess and properly evaluate bid risks. It will improve your quality bid by demonstrating that you are serious about rationalising your supply chain to deliver best value and continuous improvement to your clients. Causeway Estimating will cut traditional tender enquiry costs by up to 50%.

Sophisticated pricing tools will ensure consistent calculations, eliminate errors and significantly improve tender throughput, all resulting in improved tender win rate.

## Valuations

Whether undertaking a lump sum, target cost or term maintenance contract, Causeway Valuations allows you to value works complete and generate applications for payment with ease.

Measures are created and calculated either by quantity, percentage or value. The entry of a measure and can be used to automatically generate internal valuations and subcontract liabilities, however, independent adjustments can be made as required.

A flexible reporting system allows applications to be produced in an array of formats to suit specific client and contractor requirements. Causeway Valuations has dayworks sheets, materials on site and a variations record providing complete control of change events from inception to agreement.

Causeway Valuations will significantly reduce the time traditionally associated with QS month end procedures and reconciliations.

## E-Trading

At the heart of business operations lie the sourcing, procurement and administration of materials and service items. Handling high volumes of paper orders, invoices and despatch notes using traditional methods means numerous man-hours are spent re-keying, checking, and archiving documents.

Causeway Tradex allows supply chain partners to exchange electronic trading documents between their existing back office finance and procurement systems. Once connected, companies can trade electronically through a scalable and flexible integration hub that supports multiple document types and user services.

Simple, rapid installation means the benefits of connecting to Causeway Tradex can be achieved in a matter of days.

Tradex customers are reporting reductions in the cost of processing invoices by up to 63% with handling times and process efficiencies reduced by up to 50%.

## Business intelligence

Next to your people, the information locked inside your IT systems represents one of your most valuable assets. What is your cash position today; what might it be tomorrow; which projects' performance should be triggering alarm bells? The data that gives the answers to all these questions and more is sitting inside your existing IT systems. The challenge is how to turn that data into meaningful information, and the answer is Causeway Business Intelligence.

Causeway Business Intelligence opens up Causeway's Financials and Project Accounting suite to new technologies, facilitating detailed analysis of your existing information.
