

Causeway formwork and scaffolding management

Highlights

- Industry proven solution
- Hire + sales
- Integrated asset management & tracking
- Asset types catered for
 - scaffolding
 - formwork & falsework
 - alloy towers
 - powered access
 - fencing
 - components
 - serialised plant
- Contract management & project costing
- Invoicing inc extra hire calculations
- Damages/loss control
- Integration with financials & Payroll
- Links to key documents – i.e testing certificates
- Globally supported solution

Multi-depot stock, hire+sale and contracting

The Causeway multi-depot stock, hire + sales and contracting software is designed for business specifically engaged in hire and sales and/or the provision of contracting services relating to scaffolding, access and formwork.

Scaffolding and formwork contractors in their activities provide a combination of equipment, people and services as a solution to their customers, and as such require a specialist solution to manage these resources. The Causeway system provides a contracting business with all the tools to manage costs around equipment and labour, and accurately bill based on utilisation of those resources which includes the ability to capture charges for extra hire.

A key component of the Causeway system is the integrated asset management that caters for the special nature of scaffolding, access and formwork equipment, managing items that are stocked and hired in lengths (and potentially returned to stockholding in adjusted lengths), composite lengths (i.e. fencing) or items that are made up of many components such as alloy towers.

Because asset management is of paramount importance to both contractors and hire companies, the system provides the visibility that's needed for each discipline. For instance a contractor would need the ability to readily identify his own equipment from equipment that may have been externally hired in; issue equipment to his own contracts and internally cost for its usage and monitor utilisation. Hire companies, in order to fulfil hire + sales orders, need to be able to see stock availability in real-time – either from stock in their own yard, or held at another depot, on order or pending return from a customer.

Integration

Links to Causeway's Suite of Contractors Accounting Software, Causeway Project Accounting and other third party accounting systems via the 'Interface Bridge'.

Very powerful reporting capability within each module or the option to output to leading spreadsheet packages such as Microsoft Office.

Contract valuations

- Contract/phase/item
- Contract sum
- Housing plots
- Applications or invoicing
- MCD and discount

Contract management

- Labour vs revenue
- Cost analysis

Hire desk

- Quotations
- Check availability
- Produces hire contract
- Loading list
- Delivery ticket
- Collection instructions
- Return confirmations
- Cash management

Stock control

- Stock
- Stock location
- Stocktakes

Revenue analysis

- Hire
- Sale
- Damage
- Loss
- Contract

Multi-depot stock, hire and sales

The hire and sale business for predominantly bulk stock requires clear transaction based accountability to substantiate periodic billing. This system provides the solution while managing the following aspects of the business:

Stock control

- Ordering
- Receipts
- Receipt adjustments
- Stocktake
- Stock movements, e.g. issues to second hand, write-offs, theft, etc.
- Reservations
- Inter depot transfers
- Stock costs (current, replacement and written down)
- Stock valuation (average, FIFO or current)
- Rate changes
- Composites (e.g. alloy towers)
- Composite length items (eg. fencing)
- Structures (e.g. props and jacks)
- Standard items (e.g. fittings)
- Sundries (e.g. non stocked items)
- Length items (e.g. tube and boards)
- Minimum hire periods

Job control

- Hire or sale
- Internal contracts (job costing)
- External contracts (account and cash customers)
- Enquiries
- Quotations
- Orders
- Deliveries
- Collections
- Returns and damage/cleaning
- Site loss charges
- Site loss credits
- Hire job adjustments (over returns or disputed balances)
- Job to job transfers
- Transfers on behalf of other depots

Billing

- Hire invoices
- Sales invoices
- Sales credits (accepted returns)
- Damage invoices
- Loss invoices
- Loss credits

Integration with accounts

- Debtors ledger (or standalone)
- Purchase ledger (or standalone)
- Purchase order management (or standalone)
- Contract costing (or standalone) General ledger (or standalone)

Management reporting

- Daily transaction with highlighted exceptions e.g. rates
- Un-invoiced damage letters
- Un-invoiced loss letters
- Stock reservations
- Stock availability
- Stock orders
- Stock location
- Slow moving stock
- Stock valuation
- Stock utilisation
- Stock availability
