

FM Facts asset management

delivers a complete history of all planned or reactive tasks relating to any asset

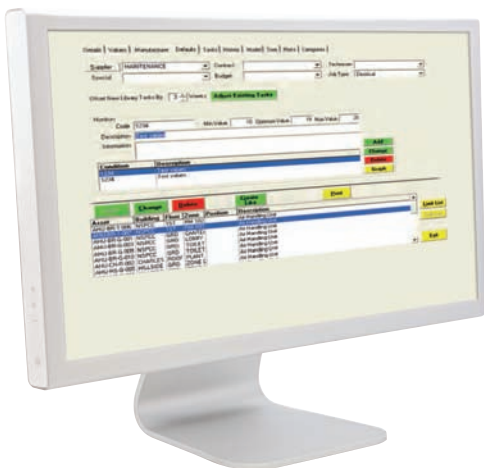

The FM Facts Asset Management module is a tool that delivers a complete history of all work, planned and reactive, relating to an asset, including relocations and breakdowns. The possession of such reliable data generates savings in PPM budgets and helps with pre-planning of budgets and asset replacement.

strategic benefits

- ▶▶ Reliable data generates savings within PPM budgets and helps with pre-planning of budgets and asset replacement.
- ▶▶ An unlimited number of assets on multiple sites can be managed efficiently from a central point.
- ▶▶ Costs are reduced as the asset 'life' is extended through improved planning and maintenance.

tactical benefits

- ▶▶ Deployment and management of technicians is optimised by the scheduling function.
- ▶▶ Creation of standard maintenance tasks is guaranteed by the task libraries function.
- ▶▶ Comprehensive asset histories are created, based on real data.
- ▶▶ Planned tasks are sent to the helpdesk giving full control and enabling monitoring of progress and effective closure.

operational **benefits**

- ▶▶ Condition Based Monitoring generates and issues high-risk tasks automatically.
- ▶▶ Data is transferred automatically enabling the creation of an easily visible asset history.
- ▶▶ Provides 'risk' information on building, floor, zone and asset informing the technician before they attend the job.

integration with other modules

Causeway provides a modular suite of automated management tools, providing comprehensive business solutions for all sizes of business. Our solutions can be expanded to meet business requirements, with full integration between modules, and are supported by a range of services delivered by a highly experienced and dedicated team.

system **administration** and **reporting**

Report creation and administration modules are provided for in-depth reporting and customising information to meet clients' needs and processes.

asset management via **SaaS**

SaaS is a method of outsourcing facilities management applications via a PC, web browser and an internet connection. The SaaS service will reduce implementation and running costs and eliminate IT issues associated with installing the software in-house.
