

# Modern Slavery Statement

## Causeway Technologies: Transparency in Supply Chains Statement

For the financial year ending 31 December 2025

### 1. Introduction

- 1.1 Causeway Technologies is committed to preventing modern slavery and human trafficking in its business and supply chains, and those of its subsidiaries.
- 1.2 This statement is made by Causeway Software Holdings Limited, the parent company of the Causeway Technologies group, on behalf of the group, including the UK subsidiary, Causeway Technologies Limited (together "*Causeway Technologies*"), in accordance with the obligations of both those entities to make a Transparency in Supply Chains ("*TISC*") under s.54 of the Modern Slavery Act 2015 (the "*2015 Act*"). This statement sets out the steps taken in the last financial year to ensure slavery and human trafficking is not taking place in any part of Causeway Technologies' business or in any of its supply chains. To enable us to achieve this, Causeway has a Quality Management System (QMS), which includes defining and improving our internal processes to understand customer requirements and meet their expectations. This forms part of Causeway's Integrated Management System (IMS).

### 2. Our Business

- 2.1 In 2025 Causeway acquired Lets Build Aproplan, a similar software application from the Lets Build business, providing field management software for on-site workflows for customers.
- 2.2 Causeway now operates through three core sites in the UK, one site in France, one site in Portugal, one site in Belgium and has a small engineering and support function in India, a very small support function in Australia, and a small sales and customer service team with an office in the US.

### 3. Our Supply Chains

- 3.1 As a software development business, our direct supply chains are relatively limited as our products and services are created by our development teams. As part of supplier onboarding and ongoing review, we identify our key suppliers and apply a consistent level of due diligence across them, with a particular focus on suppliers that handle Causeway or customer data. This due diligence covers product and service, financial, information security and business continuity considerations, aligned to our ISO 27001, SOC 2, ISO 9001 and

ISO 22301 certifications. Our accounts payable system is also able to identify third-party risks in relation to countries subject to sanctions, further reducing risk.

- 3.2 We are often required to agree to supplier standard terms and conditions, without substantive opportunity for negotiation. Our hosting partners are Google, Amazon, Microsoft and Node 4. Microsoft, Dell, Salesforce, Atlassian and Vodafone are our main IT and communications suppliers. We also have partners from whom we licence software for resale as part of Causeway products (Infor and Techsoft who are large US software providers), and a number of specialist software and technology suppliers.
- 3.3 Part of our business also involves provision of a biometric time and attendance system, including provision of electronic tablets. Tablets are sourced from one supplier in France and are manufactured in China. We also supply some limited hardware where parts are mainly sourced online. The rest of our suppliers are standard office business suppliers. Cleaning contractors clean our UK office locations. Our French, Portuguese and Belgian offices contract cleaning contractors directly.
- 3.4 To date, we have not identified or been made aware of any modern slavery issues with the suppliers we have engaged or their supply chains.

## 4. Our Polices and Contractual Controls

### Code of Conduct

- 4.1 We continue to review our Code of Conduct Policy. The Code applies to all employees across the business. The Code is intended to ensure that Causeway Technologies upholds the highest standards in the conduct of its business, and includes a requirement that everyone is treated fairly. It also sets out principles of Selflessness, Integrity, Objectivity, Accountability, Openness, Honesty and Leadership. Failure to follow the Code of Conduct is a disciplinary matter.

### Whistleblowing Policy

- 4.2 Causeway Technologies continues to have a Whistleblowing Policy in place. The Whistleblowing Policy encourages reporting of concerns including in relation to potential criminal offences, compliance with legal obligations and endangering of an individual's health and safety. The Whistleblowing Policy specifically emphasises matters concerned with the health, safety and welfare of those on our premises (whether employees, contract staff or visitors).

## 5. Risk Assessment

- 5.1 Causeway Technologies is not aware of any slavery or human trafficking issues within its business or supply chains. In the last financial year, no potential issues of this type have been identified or reported through internal reporting channels, audit processes, whistleblowing or otherwise. Causeway Technologies has not received any information indicating that there may be any such issues with any of its suppliers or their supply chains.

5.2 As noted above, our main activities are concerned with software development and the majority of our employees are in high skilled roles. This includes our India team which is composed of software engineers and software support staff. Aside from the small team in India, small teams in the US, and Australia, our footprint is mainly in the UK, Portugal, Belgium and France, all of which are lower risk countries for modern slavery, particularly in our sector.

5.3 On this basis, we consider the risk of slavery or human trafficking in our business and supply chains to be low. However, we recognise that business operations such as sourcing of electronic tablets, hardware and the electrical equipment used by our teams, as well as cleaners for our offices, are types of activity that can give rise to higher risks of modern slavery and human trafficking.

5.4 Causeway is committed to ensuring there is no modern slavery or human trafficking in our business or supply chains. As such, should any potential issue be identified, Causeway will act swiftly to investigate and, where appropriate, take responsive actions.

5.5 We continue to maintain the Modern Slavery Statement and included Modern Slavery risk within our recent acquisition.

5.6 Awareness is maintained through our Code of Conduct, Whistleblowing Policy and Anti-Bribery & Corruption Policy. Employees acknowledge these at induction and complete Anti-Bribery and Corruption training, reinforcing escalation of any modern slavery indicators. The policies are flowed down to contractors, and whistleblowing is open to both. Supplier due diligence is carried out by skilled resources familiar with modern slavery risk indicators, and we will monitor whether more targeted training is needed as our footprint evolves.

5.7 Causeway will continue to proactively consider what additional steps, if any, it should take to further guard against the risks of modern slavery.

5.8 We confirmed that no concerns relating to modern slavery or human trafficking were raised through our whistleblowing channels, internal audits or any other reporting route during the year.

## 6. Approval of this Statement

6.1 This statement is made for the financial year ending 31 December 2025. This statement was approved by the Causeway Software Holdings Limited and Causeway Technologies Limited management board on 31 May 2026.

6.2 This statement is signed by Phil Brown – Executive Chairman on 31 May 2026.
